To Our Customers,

Thank you for your overwhelming positive responses lately! We appreciate every positive Facebook comment, email, in store comment, positive vibe, and prayer you've sent our way. We are navigating uncharted waters, and truly appreciate your patience and encouragement.

We continue to work with a wide variety of sources to provide the best and safest service we can to each of you every day. Information is flowing in quickly, and we are doing our best to stay ahead and react accordingly. Here are a few updates we think are important for you to know:

- Hours of Operation:
 - We would like to reserve the hours of 7am to 9am for our customers with high risk factors such as our elderly population. We ask our regular customers to please come in after 9am. Early hours are typically slower times for our business, therefore could benefit those with risk factors by limiting their exposure to larger crowds.
 - Walt Churchill's Markets will be closing at 8pm to customers starting March 17th, 2020 until further notice. We will use this additional hour at night to enhance our cleaning efforts to increase customer and employee safety.
- Hiring: We are hiring seasonal, part-time, and full-time positions in many departments! We want to do our part and help our friends in the food service industry who may have been displaced by this crisis. Please see job postings and apply at www.waltchurchillsmarket.com
- Friday Fish Fry: We plan to have a fish fry this Friday. Meals are carry-out only. We will continue to re-evaluate this and other practices for future consideration, but for now the fish fry is on!
- Out of Stock Products: We are working with many suppliers to bring in as many products as possible to reduce our number of out of stock items. We ask for your patience and understanding as we work hard to stock our shelves with the products you need and want. We can assure you our staff is working tirelessly to reduce the impact on your shopping experience.

Walt Churchill's Market maintains our commitment in protecting the food supply, ensuring the safety of our employees, and providing our customers great quality foods to enjoy at home. We will continue to update our processes and procedures based on best practices we learn throughout this evolving situation. Please watch for updates on Facebook and our website (www.waltchurchillsmarket.com).

Please contact us with any questions.

Sincerely,
Walt Churchill's Market
